2024英语组国际传播综合能力赛项校赛及省赛样题

2024/04/19 18:28:10

一、赛题说明

国际传播综合能力赛项旨在考查当代大学生国际传播综合能力，赛题涵盖习近平新时代中国特色社会主义思想核心内容，涉及经济建设、政治建设、文化建设、社会建设和生态文明建设等领域的重要话题，考查形式包括阅读、写作、翻译、演讲等，部分赛题素材选自《习近平谈治国理政》第一卷、第二卷、第三卷、第四卷和党的二十大报告等。

校赛阶段

校赛为综合能力赛，进行读写译综合考查，鼓励有条件的院校在读写译考查的基础上增加演讲能力考查，将综合能力优秀的选手推荐参加省赛。

各参赛院校可组织学生参加大赛组委会主办的全国统一线上初赛，也可自行组织选拔。全国统一线上初赛赛题由大赛组委会提供，包括客观题若干道和议论文写作1篇，赛题构成见表1。

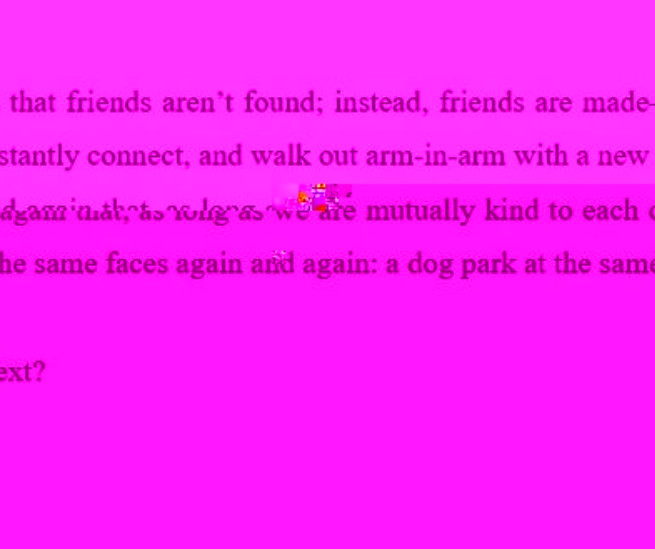
表1 校赛赛题构成

模块	要求	考查能力	题型	题量	分数	建议用时
读以博闻（Read and Know）	为术语选择正确的译文或解释	对习近平新时代中国特色社会主义思想关键术语和中华思想文化术语的理解和翻译能力	单选	5题	10分	25分钟
	阅读4篇短篇文本，每篇50—150词，选择问题的正确答案	对不同题材、不同体裁的短篇文本进行信息获取的能力	单选	6题	12分	
	阅读1张图表，判断信息正误	对图表数据进行信息获取的能力	判断	4题	8分	
	阅读3篇短篇文本，每篇100	[illegible]	[illegible]	[illegible]	[illegible]	

省赛阶段

模块	要求	考查能力	题型	题量	分数	建议用时

[illegible]



As if a declining population wasn't bad enough, a rare species of bird in Australia has now forgotten how to sing. The falling numbers of the Regent Honeyeater mean that fewer adults are around to pass on to young males the melodies they need to know to attract a mate—a problem that can only exacerbate the current situation. Some hope lies in the fact that honeyeaters are famously good mimics, and so scientists are [illegible]ting if they can be retaught their vocal skills by artificial means in a lab. And perhaps, we cheekily suggest, our feathered friends could be taught some new tunes at the same time? A bit of William Byrd would be an obvious place to start...

8. What does the underlined word "**exacerbate**" probably mean?
A. settle
B. reduce
C. control
D. worsen

9. What is the best title for the text?
A. Songful Dismissal Proves a Worry for a Male Bird
B. Regent Honeyeaters Are Being Pushed to the Brink
C. A New Application of Artificial Intelligence in Music
D. Significance of Artificial Environment in Birds' Singing

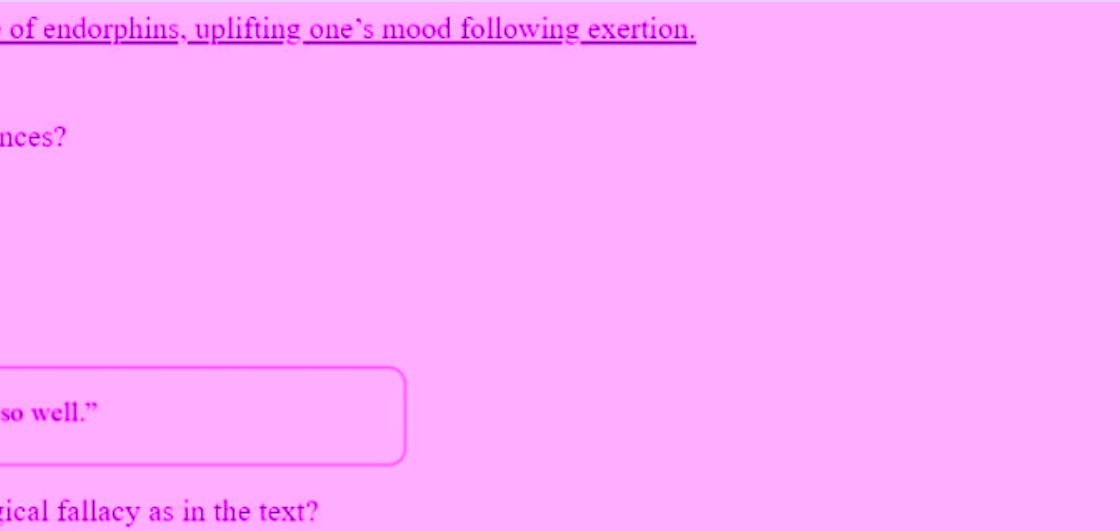
One thing to remember in our age of instant gratification is that friends aren't found; instead, friends are made—crafted, really—over time. It takes 6 to 8 conversations before someone considers us a friend. We wish we could walk into a party, instantly connect, and walk out arm-in-arm with a new BFF (Best Friend Forever), but really it's an incremental process. The good news is [illegible] we are mutually kind to each other, we become friends with whomever we see most often. __11__ and repetition are key. So put yourself in situations where you see the same faces again and again: a dog park at the same time each morning, a weekly writer's workshop, or a co-working space.

10. What factor is essential to friend-making according to the text?
A. Mutual affection.
B. Frequent contact.
C. Instant connection.
D. Face-to-face communication.

11. What is the missing word probably?
A. Inclusion
B. Attraction
C. Proximity
D. Diversity

Questions 12-15

[illegible]: Read the chart and decide whether the following statements are True or False.



Based on The International Renewable Energy Agency's renewable energy statistics.

Note: GW=gigawatt

12. The chart reflects not only the steady and increasing growth in the use of renewables but also the continuous decline in the growth of non-renewable capacity.
True ( ) False ( )

13. The renewable generation capacity in 2020 was more than six times the non-renewable generation capacity.
True ( ) False ( )

14. The renewable generation capacity has accounted for more than half of total electricity generating capacity since 2015.
True ( ) False ( )

15. The renewable generation capacity has been g[illegible]an the non-renewable generation capacity since 2012.
True ( ) False ( )

Part II Read and Reason

Questions 16-18

Directions: Read the texts and answer the questions.

For novice exercisers, morning workouts are often the most dreaded. ①But morning workouts have their advantages. ②These chemicals, along with a few others, boost energy levels, alertness, and focus, which can make you more productive and attentive at work. ③Trading a cozy, nurturing bed for a sterile, unforgiving fitness center can be a rude awakening to say the least. ④Challenging the body triggers the release of endorphins, uplifting one's mood following exertion.

16. What is the right order of the numbered sentences?
A. ③①④② B. ④①②③
C. ③②④① D. ④③②①

"Mark Twain is a wonderful writer because he writes so well."

17. Which of the following commits the same logical fallacy as in the text?
A. "My professor, who has a Ph.D. in Astronomy, once told me that ghosts are real. Therefore, ghosts are real."
B. "I don't see how you can say you're an ethical person. It's so hard to get you to do anything; your work ethic is so bad."
C. "It is possible to fake the moon landing through special effects. Therefore, the moon [illegible] was a fake using special effects."
D. "You should believe me because I'm an expert in this field, and how do you know I'm an expert? Well, because I have the knowledge and expertise."

Suppose a hunter walks all the way around a tree trying to get a shot at a squirrel. Meanwhile, the squirrel never leaves the tree but keeps crawling away from the hunter so that he can never get a clear shot at the squirrel. In other words, the squirrel keeps the tree between the hunter and itself. When John Brown and Henrietta Lacks discuss this hunting situation, John says the hunter circles the squirrel because the squirrel never leaves the tree and the hunter gets to the north, east, south, and west of the tree. Henrietta disagrees, saying the hunter never circles the squirrel because he will never get round to the back of the squirrel.

18. What can be concluded from the disagreement between John and Henrietta?
A. John lies when saying the squirrel cannot escape from the hunter's circle.
B. John believes the hunter is flexible enough to finally get a clear shot at the squirrel.
C. Henrietta thinks the hunter can never get behind the squirrel and shoot it in its back.
D. Henrietta guesses it is the tree that blocks the hunter's sight to accurately target the squirrel.

Questions 19-25

Directions: Read the texts and answer the questions.

Chinese company Space Transportation wants to take a jab at the growing space tourism market with a winged rocket capable of suborbital travel. The reusable space plane could take wealthy tourists to the edge of space and then land them on the other side of the world in no time.

Space Transportation was founded in 2018 and it managed to raise $46 million to develop its [illegible] supersonic spaceplane in August, 2021. Although details are still scarce [illegible]

[illegible] Space Transportation sounds like the Chinese version of Virgin Galactic and, to a lesser degree, SpaceX. In the summer of 2021, Virgin CEO Sir Richard Branson made headlines after he went on an 11-minute suborbital flight, reaching 55 miles (88 km) above the Earth's surface. Just a week later, fellow billionaire Jeff Bezos made it past the Kármán Line, the internationally-recognized boundary of space, at nearly 62 miles (100 km) above the Earth's surface, aboard a capsule launched by Blue Origin's *New Shepard* reusable rocket.

Global space tourism is projected to reach just $1.7 billion by 2027, according to a report published in 2021. Virgin Galactic has hundreds of reservations for tickets on future flights, sold between $200,000 and $250,000 each. No reservation data has been made public by Blue Origin, but we can presume they'll soon start making more commercial space tourism flights.

However, neither Virgin Galactic nor Blue Ori[illegible] seems to be interested in point-to-point travel. In addition to potential space tourism flights, Space Transportation's ve[illegible]

[illegible]

about. You will have banished the mysteries that are so important. You will be full of ego, thinking that you know what you are talking about, when in fact you are only defending against your ignorance. The starting point toward wisdom is to acknowledge your basic ignorance, your not-knowing.

Let's delve into the phrase "beginner's mind". You can always find a frame of mind in which you are a beginner, maybe once again. You keep coming back to the role of student and novice, open to learning because there is something you know you do not know. How fruitful that attitude is. But you could discover it in any situation, acknowledging and appreciating the extent to which you don't know something. Sometimes achieving it may require a little bruising to the ego, but that is always a good thing.

When you cultivate not-knowing along with learning, you also allow room for mystery, for the profound and inexplicable parts of life that give you a sense of awe. An appreciation of the unknowable keeps you honest and humble in the best way. The truly wise person knows how important it is not to know everything.

I sometimes find myself giving a lecture or speaking in an interview when I know I don't know at all what I am talking about. Usually, that is because the topic is unknowable. I often speak about the soul, for instance, yet after years of study I still don't know just what the soul is.

The trouble with some teachers and leaders is not that they don't know what they are talking about, but that they don't know that they don't know what they are talking about. They go on blissfully using words that even they do not really understand, but they think they do, or at least talk as if they do.

The solution is to admit to our ignorance and try to clear our minds of preconceptions. These are Thoreau's recommendations. Try to forget what you think you know. Don't rely on authoritie[illegible]
